# HOLY ✟ TRINITY
## BLUE G

1) 18% of 42 metres

2) $\dfrac{-3+1}{2} + 4$

3) How much less is $3\frac{2}{7}$ than $8\frac{1}{7}$?

4) What is the product of 81 and 0.91?

5) If £3 is the same as €4.26, what is £5.50 in Euros?

6) A dish contains 2000 bacteria. The number of bacteria increases by 16% per hour. How many more bacteria are there in 1 hour?

7) Use division and recurring decimal notation to turn $\frac{5}{6}$ into a decimal.

8) Jimmy is putting grass seed down in his rectangular garden, of length 8m and width 18m. Each bag of grass seed costs £8 and covers $11m^2$. Jimmy receives a 35% discount on the first 10 bags, and a 50% discount on every additional bag.
Calculate the total cost of Jimmy seeding his lawn.
